AIR-CELL Permishield®

VAPOUR-P ERMEABLE INSULATION MEMBRANE

WINNER HA WA
PRODUCT INNOVATION AWARD

- 3-in-1 Insulation, thermal break and vapour-permeable sarking
- Helps achieve a 6-star house energy rating
- Fibre-free, non-allergenic, non-irritant
- Quick and easy to install
- Strong, tough, durable
- Water-resistant and unaffected by moisture
- Anti-bacterial and anti-fungal
- Rodent and insect resistant
- Compliant with AS/NZS 4859.1
- CodeMark-certified for BCA compliance

Low Energy –
Low Carbon Buildings

Reverse Brick Veneer Wall

Typical Design Details

Figure 1 **Kingspan AIR-CELL Permishield® 65** in reverse brick veneer wall installation

Figure 2 Side elevation of **Kingspan AIR-CELL Permishield® 65** in a reverse brick veneer wall

Thermal Performance

Reverse brick veneer wall	Heat flow in	Heat flow out
Kingspan AIR-CELL Permishield® 65	$R_T 2.0$	$R_T 2.1$

The R-values shown are Total R-values for the building element as required by the Energy Provisions of the Building Code of Australia. **Kingspan AIR-CELL®** products are manufactured, tested and packaged in conformance with AS/NZS 4859.1. The contribution of the product Total R-values depends on installation and environmental conditions.

Specification Guide

The wall insulation fixed to the batten shall be vapour-permeable, CodeMark-certified **Kingspan AIR-CELL Permishield® 65** fibre-free, thermo reflective insulation, comprising a cross-linked, closed-cell foam core sandwiched with an anti-glare foil facing on one side and a plain foil facing on the other side manufactured by Kingspan Insulation Pty Ltd and shall be installed in accordance with the instructions issued by them.

Installation Instructions

1. Roll out **Kingspan AIR-CELL Permishield® 65** horizontally and fix to batten.
2. Cut **Kingspan AIR-CELL Permishield® 65** carefully around doors, windows and other openings, so that it neatly abuts to frames.
3. Butt join **Kingspan AIR-CELL Permishield® 65** sheets and tape with a 48 mm wide reinforced foil tape (please refer to brochure "Kingspan Insulation Tape" for further information).
4. Fix counter battens and exterior cladding.

For detailed Installation Instructions please refer to the brochure "Reverse Brick Veneer Walls".

Steel-framed Wall

Typical Design Detail

Figure 3 **Kingspan AIR-CELL Permishield®** on steel-framed wall

Thermal Performance

Product	Heat flow in	Heat flow out
Kingspan AIR-CELL Permishield® 65	R _T 1.6	R _T 1.8
Kingspan AIR-CELL Permishield® 80	R _T 1.7	R _T 1.9

The R-values shown are Total R-values for the building element as required by the Energy Provisions of the Building Code of Australia. Kingspan AIR-CELL® products are manufactured, tested and packaged in conformance with AS/NZS 4859.1. The contribution of the product Total R-values depends on installation and environmental conditions.

Specification Guide

The wall insulation fixed to the outside of the stud frame shall be vapour-permeable, CodeMark-certified **Kingspan AIR-CELL Permishield®** _____ (specify 65 or 80) fibre-free, thermo reflective insulation, comprising a cross-linked, closed-cell foam core sandwiched with an anti-glare foil facing on one side and a plain foil facing on the other side manufactured by Kingspan Insulation Pty Ltd and shall be installed in accordance with the instructions issued by them.

Figure 4 Side elevation of **Kingspan AIR-CELL Permishield®** on steel-framed wall

Installation Instructions

1. Fix **Kingspan AIR-CELL Permishield®** loosely to the outside of frame leaving flexibility for the insulation to be dished onto the wall cavity.
2. Cut **Kingspan AIR-CELL Permishield®** carefully around doors, windows and other openings, so that it neatly abuts to frames.
3. Butt join **Kingspan AIR-CELL Permishield®** sheets and tape with a 48 mm wide reinforced foil tape (please refer to brochure "Kingspan Insulation Tape" for further information).
4. Provide for outer air space by adhering the **Kingspan AIR-CELL Spacer Biscuits™** to the outer face of the **Kingspan AIR-CELL Permishield®** (approximately three Biscuits™ per square metre required).
5. Commence installing cladding in accordance with manufacturer's installation instructions.

For detailed Installation Instructions please refer to the brochure "Steel-framed Walls".

Product Details

Product Description

Kingspan AIR-CELL Permishield® (Patent No. 2012100976) is a revolutionary vapour-permeable barrier and insulation wrapped up in a single product. **Kingspan AIR-CELL Permishield®** is designed specifically for steel-framed wall applications for use behind lightweight cladding materials that require vapour permeance. Manufactured with a patented closed-cell structure sandwiched by highly reflective foil surfaces and pierced with tiny, evenly-spaced breather holes, **Kingspan AIR-CELL Permishield®** allows building professionals to do away with the traditional sarking-plus-batts combination in order to achieve thermal compliance as well as satisfy vapour permeance.

Product Data	Kingspan AIR-CELL Permishield® 65	Kingspan AIR-CELL Permishield® 80
Product Code	PS065	PS080
Product Thickness	6.5 mm	8 mm
Product R-value	R0.2	R0.25
Roll Diameter	450 mm	500 mm
Roll Weight	9.15 kg	10 kg
Roll Size	1350 mm x 22.25 m (30 m ²)	
Reflectance		
Anti-Glare Face	95%	
Reflective Face	97%	
Emittance		
Anti-Glare Face	E0.05	
Reflective Face	E0.03	
Max. Span	2.4 m	

The R-values shown are Total R-values for the building element as required by the Energy Provisions of the Building Code of Australia. Kingspan AIR-CELL® products are manufactured, tested and packaged in conformance with AS/NZS 4859.1. The contribution of the product Total R-values depends on installation and environmental conditions.

Management Standards

Standard	Management System
BS / I.S. EN ISO 9001:2008	Quality Management
AS/NZS ISO 14001:2004	Environmental Management

Product Specifications

Characteristic	Test Method / Standard	Specification
Flammability Index	AS 1530.2	≤ 5
Material Thermal Resistance	ASTM C518	0.2 m ² -K/W (6.5 mm) 0.25 m ² -K/W (8 mm)
Emittance	ASTM E408	Reflective Face E0.03 Anti-Glare Face E0.05
Duty Rating (Burst Force)	AS 3706.4	1.0 kN - equivalent to Extra Heavy Duty
Vapour Barrier	ASTM E96	Medium Resistance
Shrinkage	AS/NZS 4201.3	< 0.5%
Dry Delamination	AS/NZS 4201.1	Pass
Wet Delamination	AS/NZS 4201.2	Pass
Water Barrier	AS/NZS 4201.4	High Resistance
Water Absorbency	AS/NZS 4201.6	Unclassified
Corrosion Resistance	AS/NZS 4859.1 Appendix I	Pass

Environmental Data

Aspect	Characteristic
Recycled Content	Approx 3%
Recyclability	Waste not recyclable Roll width to suit most applications to minimise on site waste
Re-usability	Re-usable if removed with care (long term of service expected)
Water Use	No water used in Kingspan Insulation's manufacturing process
Processing Greenhouse Gas Emissions	No Greenhouse Gas Emissions in Kingspan Insulation's manufacturing process
Ozone Depleting Substances	None present in the finished product or in Kingspan Insulation's manufacturing process
Packaging	Contains approx 10% recycled product Packaging 100% recyclable
Transport	Distribution policy incorporating the principals of ISO 14001
Embodied Energy	43 MJ/m ² approximately

General Requirements

1. Fit *Kingspan AIR-CELL*[®] neatly around doors, windows, and any penetrations, and tape if necessary to prevent air leakage.
2. When taping a plastic squeegee or blade must be used to apply appropriate pressure to the tape. Surfaces must be dry and free from dust, oil or grease prior to taping (please refer to brochure 'Kingspan Insulation Tape' for further information).
3. Leave minimum 50 mm clearance around heat producing flues or light fittings (refer to light fitting manufacturer).

The instructions in this document are guidelines only and should be interpreted with consideration for the specific building design. The installation of *Kingspan AIR-CELL*[®] should be in conformance with the applicable clauses from AS 3999 and AS/NZS 4200.2 unless otherwise specified.

Kingspan AIR-CELL[®] can be damaged by intense heat above 105° C and contact with sparks and flame from blow torches, welders, cutting tools, etc. must be avoided.

The installer must make due provision for safety when installing *Kingspan AIR-CELL*[®] in any application.

Safety Information

- Non-hazardous/non-toxic.
- No personal protective equipment required.
- UV protective sunglasses and screen should be used when installing in direct sunlight.
- Ensure at least 50 mm clearance from hot flues and light fittings (check for safe distance with lighting supplier).
- **Foil facings are conductive to electricity - avoid contact with un-insulated electrical cables and fittings.**

Handling and Storage

Kingspan AIR-CELL[®] insulation products must be transported and stored in its protective packaging and kept clean and dry. Standing rolls on end reduces risk of damage should moisture be present in the packaging. Surfaces must be kept free of contaminants such as dust and grease, and must not be stored with foil surfaces in contact with alkaline materials i.e. wet cement, lime, etc.
