OUR HERITAGE

Roofing & Profiles (Fiji) Pte Ltd - Established in 2002, with its manufacturing, engineering, construction & Multibuild division in Ba, Fiji. RPFL is the largest manufacture of Roofing Sheets of various Roof profiles, Purlins, Rainwater goods and are also undertaking design, fabrication and installation of complete steel structure in both Hot Rolled and Cold form Pre-fabricated System. All Building systems fully meet the Fiji building codes, cyclonic conditions.

RPFL's Multibuild Team is fully equipped with Project Management Team: consist of Project Managers, Project Administrators, Structural Engineer, Quantity Surveyors, Draftsman's and Project Coordinators.

Our steel building system can be utilized for a multitude of projects ranging from small back yard tool room to a large aircraft hangar. We supply carport shed, garage, farm shed, workshop barns, tool rooms, warehouses, factories, industrial and high rise building. We offer a variety of sizes that can be expanded even after your steel building has been constructed.

Advantage of Buying Pre-fabricated Steel Structure: consistent quality, timely delivery to match your work program, reduced site disruption, shorter construction time, offered in various coating system, meeting all local standards.

Today, Roofing and Profiles has grown into a powerhouse and market leader in General Roofing system and in supply of Pre-fabricated Steel Structure with number of successfully completed projects.
